

Bullet Points for Earth Science

During the 2016-2017 school year I will utilize the following bullet points to help lay a scientific foundation for the seventh grade through earth science.

- How to properly research.
- To realize that science happens around us every day and is important to our daily lives.
- To have better public speaking skills through weekly current event assignments.
- What exactly earth science is
- To learn about the different branches of earth science.
- A thorough understanding in the different areas of earth science.
- To get an idea of what a science lab is and how it is utilized.
- To develop a scientific vocabulary to help in future science classes.
- To get a thorough understanding of astronomy.
- To learn about the dangers and risks meteorologist take every day.
- To learn how to identify problems
- To learn about everyday physical phenomena
- Know basic problem-solving skills.
- Learn how to do scientific notation
- Learn how to organize data.
